

Teen Social & Emotional Skills

**Hinsdale, IL In Person &
VIRTUAL GROUPS
NOW ENROLLING**
clients in
CO, IA, IL, & IN

Teenagers spend time learning more about their emotions. Cognitive Behavioral Therapy is used to build a foundational understanding of how thoughts combined with emotions impact our behaviors. The group works to provide an environment where participants are encouraged to tolerate and cope through emotions. Participants increase their emotional tolerance by practicing effective communication and use of stress tolerance tools with each other. We will spend a portion of each group practicing a new coping skill.

~
6 or 8 weeks
Start day & time TBD

Adult Groups

VIRTUAL groups NOW ENROLLING for clients in CO, IA, IL, & IN.

Social Group

This group is designed to increase comfort level in social situations. Adult participants learn & practice new skills each week. Included are how to start, maintain, & end conversations. Also, how to keep a conversation going. What is a healthy vs unhealthy communication. In addition, focus on self-awareness & feeling empowered in relationships.

Social and Emotional Regulation Group

Cognitive Behavioral Therapy (CBT) and Dialectical Behavioral Therapy (DBT) are used to build a foundational understanding of how thoughts combined with emotions impact social behaviors.

Participants increase their emotional tolerance by practicing effective communication and use of stress tolerance tools with each other. The group works to provide a safe place where participants are encouraged to tolerate and cope through emotions.

Enhance Executive Function & Improve Emotion Regulation

We examine types of executive function such as planning, cognitive flexibility, & self monitoring. Also, Cognitive Behavioral Therapy (CBT) and Dialectical Behavioral Therapy (DBT) are used to build a foundational understanding of how thoughts combined with emotions impact social behaviors. Group members work together to provide a safe place to practice new executive function and coping techniques.
